PATRICIA FARLEY

for state senate district 8

Smart. Compassionate. Leader.

Patricia Farley is not your typical Republican. She is a single mom who understands the problems we face in public education and healthcare. Patricia was the leader of an organization devoted to assisting AIDS patients with healthcare and housing. Patricia Farley is a smart, compassionate leader who will serve us well in the Nevada State Senate.

Better Schools for Our Children

Clark County classrooms are overcrowded and too many children cannot read. Patricia Farley supports hiring more teachers to reduce class-size and expanding reading programs to ensure that all children can read by the third grade. Patricia believes we must increase pay to keep our best teachers in the classroom.

A Plan to Fund Public Education

Foreign and out-of-state gold mining companies extract \$10 billion worth of gold from Nevada every year, but they pay an effective tax rate of only 1.6%. By comparison, we all pay a sales tax rate that is 500% higher than the gold mining industry pays. Patricia Farley believes the gold mining industry should pay its fair share to fund public education.

Expand Healthcare Services

Patricia Farley supports requiring insurance companies to pay for women's healthcare, including mammograms, cervical cancer screenings and birth control. She supported legislation that expanded Medicaid to cover 500,000 Nevadans, and she supports expanding mental health services. As the former leader of Nevada's largest AIDS charity, Patricia believes that everyone deserves quality healthcare.
