RE: Key Poll Findings – Nevada Poll  

The Race for Governor  
Nevada Governor Brian Sandoval holds a commanding 22% lead over Democratic challenger Bob Goodman (56-34%). Likely voters have a decidedly favorable opinion of the Governor (58% favorable, 30% unfavorable).

Among Hispanic voters, Sandoval leads 54-39%. Goodman suffers from low name identification with only 38% having heard of the Democrat. As a result, he receives only 60% of the vote among Democrats whereas Sandoval garners 84% of the Republican vote.

Reid vs. Sandoval 2016  
In a hypothetical matchup for U.S. Senate in 2016, Governor Sandoval leads Senator Harry Reid by 10% (53-43%). Sandoval leads 65-28% among independent voters and 52-43% among self-identified “moderate” voters.

Fifty-five percent of likely voters hold an unfavorable opinion of Senator Reid while 41% hold a favorable opinion. The deficit is -10% among women (43% favorable, 53% unfavorable) and -19% among men (39% favorable, 58% unfavorable).

The Race for President 2016  
In three hypothetical matchups for President in 2016, former Secretary of State Hillary Clinton leads three Republican challengers. Kentucky Senator Rand Paul trails Clinton by just 3% (47-44%) while former Florida Governor Jeb Bush and New Mexico Governor Susana Martinez trail Clinton by 5% and 13% respectively.

Clinton leads Paul by 6% among women (49-43%) and draws even among men (45-46%). However, Paul leads 52-35% among independent voters. Paul garners stronger support than Bush among Republicans (79% for Paul, 76% for Bush) and conservative voters (75% for Paul, 64% for Bush).

Ballot Initiatives  
The ‘margin tax’ on the ballot in November is opposed by 49% of likely voters; 40% support the tax. The measure is politically polarizing with 78% of Republicans opposed and 69% of Democrats in support. Women are split with 44% in support and 43% opposed. Men are strident in their opposition to the initiative (35% support, 55% opposed).

The survey also tested two potential ballot initiatives in Nevada. Voters are virtually deadlocked on both. First, 45% of likely voters (for 2014) support an initiative to legalize same-sex marriage while 47% are opposed. Second, 46% support legalizing private possession of up to one ounce of marijuana; 47% are opposed.
METHODOLOGY:
The sample size for the survey is 602 likely voters and the margin of error is +/-3.99%. The Interactive Voice Response (IVR) automated telephone survey was conducted July 26-29, 2014 by Harper Polling. The total percentages for responses may not equal 100% due to rounding.
